STOLAB's "Year 2000" Compliance

STOLAB has completed an evaluation of all of its manufacturing, accounting, order processing, purchasing, and other "in-house" software to make sure that the coming of the new millennium does not create a problem.

We are happy to be able to report to you that we will not have any interruptions or other difficulties with "Year 2000".

Effect of "Year 2000" on the operation of STOLAB PL SYSTEM products

PL SYSTEM products do not use any microcontrollers, microprocessors, or software, and therefore are not affected by "Year 2000". This includes all "900" series PL SYSTEM electronics (911 PL-F/C, 921 A PL-F/C, 954 PL-F, and 954 PL-C), the STOCAL PL-100 C calibrator, Model 905 SW and 910 SW switch boxes, and all Type PL temperature sensors.

No special provisions are needed to use your STOLAB PL SYSTEM after 31 December 1999.
